## EA PLUG and Play

PATIENT LATERAL TRANSFER AND  
REPOSITIONING AIR ASSISTED  
MATTRESS

Designed for use in:

- The OR - Operating Room
- For Intensive and Critical Care
- For Imaging and Radiology
- In Wards
- And as a General Purpose Patient Lateral Transfer Air Mattress in the Hospital

### 3PS - Patient Positioning and Placement System

The **3PS System** makes Application and Transfers Easy.

The **3PS System** facilitates the Easy Application and Positioning of the Patient and helps with the Easy Placement of the Air Mattress on transfer

### Individually Identifiable and Traceable

The **uSN** (Product Unique Serial Number) on the Air Mattress provides all the information necessary about each individual product including:

- The Date of Manufacture
- Details and QC (Quality Control) of the Raw Materials utilised in the construction and manufacture of the Air Mattress
- The Operatives involved in the construction and manufacture of the Air Mattress
- The QC (Quality Control) Inspection of the finished products, and
- Product Packaging and Presentation including details of the Packing Operative.
