## PDK Access Control

### Anywhere. Anytime. Any Device.

Pdk io provides the most powerful and streamlined access control platform on the market. Experience full configuration and management from any internet connected device. Manage users, create groups, open and close doors, set system rules, send SMS & email alerts, instantly allow or revoke facility access, and more. All in a single App. Backed by the industry's highest security standards, pdk io services are hosted in highly secure and redundant cloud servers. For added security two-factor authentication for users can be enabled before any account changes take place.

# NURSE CALL ALARM

## Systems Technologies – Wireless Nurse Call

www.WirelessNurseCall.com

### VISION LINK NURSE CALL SYSTEM – Flexible, Reliable, Affordable

**VisionLink** nurse call offers the unique ability to meld many patient technology systems into one centralized system that helps to provide patient focused care with superior facility management. It easily installs into almost any size of facility, whether it be a single building or a 100 acre campus, and it integrates with smoke detectors, wandering patient door equipment, pocket pagers, wireless phones, and other software and hardware options. It's flexibility allows us to customize a system that will meet the needs of your facility and provide improved safety for patients and managed freedom for residents.

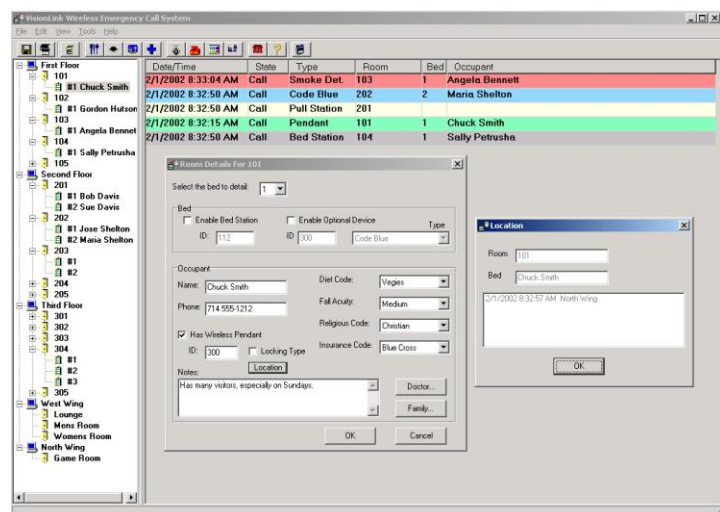

### Start Small, Think Big!

The **VisionLink II** Nurse Call System uses the Windows 10® operating system. Pendant transmitters signal assistance is needed plus provide fall alarm, wander alerts and resident location. The scheduler reminds caregivers to give medications, lock doors or perform other tasks. No expensive licenses or upgrades are required to add more equipment at any time. Go wireless when adding a new wing or building and save on conduit and wiring costs. For dome lights just add a single two wire loop through the corridors. For a multi-building campus, add repeaters to send assistance calls to the nearest console by day and a centralized console at night.

### STANDARD FEATURES

- Industrial computer and solid state hard drive
- 900 MHz spread spectrum technology
- Fully supervised (self-testing)
- Alarm calls reset at the source
- Password protection
- Visual/audible alarm prioritization
- User replaceable long-life battery
- Statistical reports package
- Battery back-up included
- Email notification
